ABOUT

With a diverse background spanning music production and the service industry, I found my calling in web development, leveraging my artistic and technical prowess. My journey began with a degree in Arts Administration and evolved into a dynamic fusion of creativity and technology, inspiring my enrollment at Nashville Software School. I constantly seek new ways to hone my problem-solving skills, fueled by an innate passion for continuous learning.

PROJECTS

Bandplanner | [View Site](#) | [View code](#)

Technologies Used: Python, Django, React, TypeScript, CSS, Heroku, Cloudinary, RapidAPI

A full-stack app that aims to ease the independent musician's burden of juggling administrative tasks with the goal of carving out more time for passion and creativity. It's front-end is written in React and it's back-end is a RESTful API written in Python and Django. It has full CRUD functionality across several interconnected data sets. I deployed this application using Heroku.

PantryCheck | [View Site](#) | [View Code](#)

Technologies Used: React, Javascript, CSS, Python, Django, Netlify, Digital Ocean, GoogleMaps

A full-stack app for adding and organizing items on a grocery list. Features include: an embedded GoogleMaps store locator, filtering products by category and priority, and calculating the estimated cost of all items on a list. I deployed this application using Netlify and Digital Ocean.

EDUCATION

Nashville Software School

Certificate, Software Development
Jan 2023 - July 2023

B.A. in Arts Administration

Indiana University Bloomington
Aug 2014 - May 2018

TECHNICAL EXPERIENCE

NASHVILLE SOFTWARE SCHOOL

Jan 2023 - June 2023

Full-time six month intensive program learning front-to-back-end web development.

- Individual and group projects completed using GitHub, Scrum workflow, retrospectives and demonstrations
- Completely remote workflow for 4 months

Back-End

- Built RESTful APIs in Django and Python that utilize url routing, HTTP query parameters, user authentication with authtoken, testing with unittest
- Built full-stack web-apps with Django and Python Model View Template approach
- Utilized Python to create CLIs with classes, interface classes, multiple inheritance, decorators, and try/except blocks

Front-End

- Built dynamic, reactive single-page applications using React and JSX; utilizing routing, views, props, and state with hooks
- Retrieving and manipulating data from SQL databases with ORM and SQL queries
- Utilizing JavaScript and HTML to render to the DOM information pulled from APIs
- CRUD functionality on persistent data through HTTP Methods triggered by user actions

PROFESSIONAL EXPERIENCE

Bartender, Server | Fairlane Hotel, Nashville, TN

March 2022 - Present

- Mixes and serves alcoholic beverages as per client request and suggests drinks/house specials to new clients
- Learned more than 50+ cocktail recipes and crafted 3 original cocktail recipes
- Communicates guest needs and relays time sensitive information between FOH and BOH staff quickly and effectively

Musician, Creative Director | Heaven Honey

August 2017 - Present

- Manages complete book of business
- Planning, creation and on-time execution of deliverables on production timelines
- Identifies and oversees all personnel involved with production schedule
